

Product: Gryphon™ I GD4110

Product Bulletin Number: PB20100129

Dated: January 29, 2010

General Availability: February 5, 2010

Public Announcement: February 12, 2010

Introducing the Gryphon™ I GD4110 with EAS Capability

Overview

Datalogic Scanning is pleased to announce that the successful Gryphon™ family has now been further extended with the introduction of the new Gryphon I GD4110 reader with EAS capability, which provides full integration with Electronic Article Surveillance (EAS) systems.

EAS is a system that helps to reduce shoplifting losses and used to identify items as they pass through a gated area by using tags and labels. For this reason, an increasing number of systems are now installed worldwide, primarily in the retail market.

Unique for its characteristics and versatility which makes it suitable for many working environments, the Gryphon EAS reader provides outstanding performance when used at the counter: it is lightweight, easy to use with fast reading capabilities as well as robustness with unique features such as the Datalogic patented Green Spot. These all combine to make this reader the ideal solution in check-out activities.

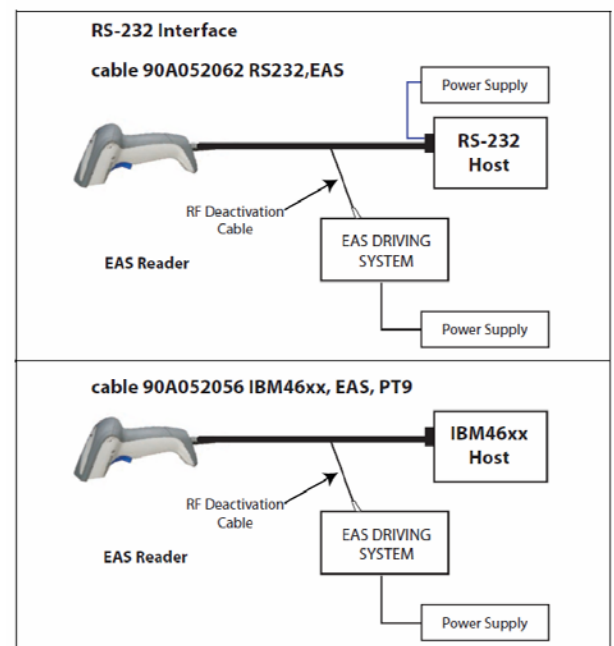

With additional features developed to be integrated in the most important EAS systems (i.e. Checkpoint™), the Gryphon EAS reader incorporates the requirements of all applications in the retail market.

The Gryphon™ GD4110 EAS reader is provided with an integrated EAS antenna and dedicated EAS cables (RS-232 and IBM 46XX) for easy connections and compatibility with EAS systems, guaranteeing EAS tag deactivation and bar code reading in a single motion. Tag deactivation is performed by simply bringing the reader within a short distance of the tag. Deactivation distance is dependant on the tag/label size and ranges in distance between from 0 to 4.0 cm / 1.5 in.

Besides the EAS connectivity, the Gryphon GD4110 EAS reader has the same features and performance as the standard Gryphon GD4110 models. This includes the Remote Host Download feature which is needed in retail applications to lower service costs and to improve operation efficiency.

EAS Connections

Models Available

Part Number	Description	Available
GD4110-WH EAS	GRYPHON D4110-WHITE EAS	February 5, 2010

Cables Available

Part Number	Description	Available
90A052056	CBL ASY, IBM 46XX, PT9, SDL4, POS, COIL, 3M	February 5, 2010
90A052062	CBL ASY, RS-232, EAS, E/P, 9D, F, COIL, 3M	February 5, 2010

Accessories

The Gryphon GD4110 EAS shares the same power supplies, stands and holders used for the standard Gryphon GD4XXX readers.

Service and Technical Support

All models of the Gryphon GD4XXX come with a standard 5-Year factory warranty. Service will be provided either by Datalogic Scanning or Datalogic Scanning Authorized Service Providers.
